# Magnetic Resonance Spectroscopy: Transition from Chemistry to Medicine

**Date & Time: - 17th April 2020  
from 1:00pm to 2:00pm**

Dr. Sanjeev Chawla's research interests include development and application of advanced magnetic resonance imaging and spectroscopy methods in studying brain tumors, head and neck cancers and neurodegenerative diseases. He believes that novel imaging biomarkers would advance our understanding of pathophysiology of these diseases, facilitate their diagnosis and enable monitoring of response to established or emerging therapeutic interventions.

**Dr. Sanjeev Chawla**

*Research Assistant Professor  
at Perelman School of Medicine  
at University of Pennsylvania,  
Philadelphia, Pennsylvania*
